

Conflict Mineral Policy Statement

The term “Conflict Minerals” refers to certain minerals and derivative metals extracted in the east province of Republic Democratic of Congo (“RDC”) and adjoining countries (“affected countries”) whose exploitation is related to severe social and environmental abuses. As a consequence of these abuses and the violation of human rights, the U.S. Securities and Exchange Commission (“SEC”) adopted final rules implementing Section 1502 of the Dodd-Frank Wall street Reform and Consumer Protection Act (“the Conflict Minerals Rule”). This ruling requires companies to publicly report on their use and the source of these minerals. The “Conflict Minerals” also known as “3TG”, are tin, tantalum, tungsten, gold and derivatives without regard to the location that these minerals or derivative metals are obtained, processed or sold.

Industrias R. Jimenez s.a. as a company committed to sustainable development and law compliance, adopted the required measures to support the efforts to eliminate the use of “Conflict Minerals”.

- **Industrias R. Jimenez s.a.** expects from its suppliers to provide statement on “Conflict Minerals” guaranteeing that the supplied materials are DRC Conflict Free
- **Industrias R. Jimenez s.a.** will not source from a supplier if it is determined that the supplied material is not DRC Conflict Free.

Industrias R. Jimenez s.a. fully understands the importance of this issue to its customers and is committed to acting in due diligence with its suppliers to verify the compliance of this policy.

Javier Jimenez, CEO
